This is weird!

Lucentis and Pregnancy

- Not advised for use in pregnancy.
- Although there have been case reports of normal live human births in people who have received anti-vegF agents during pregnancy, no drug trials on pregnant women.

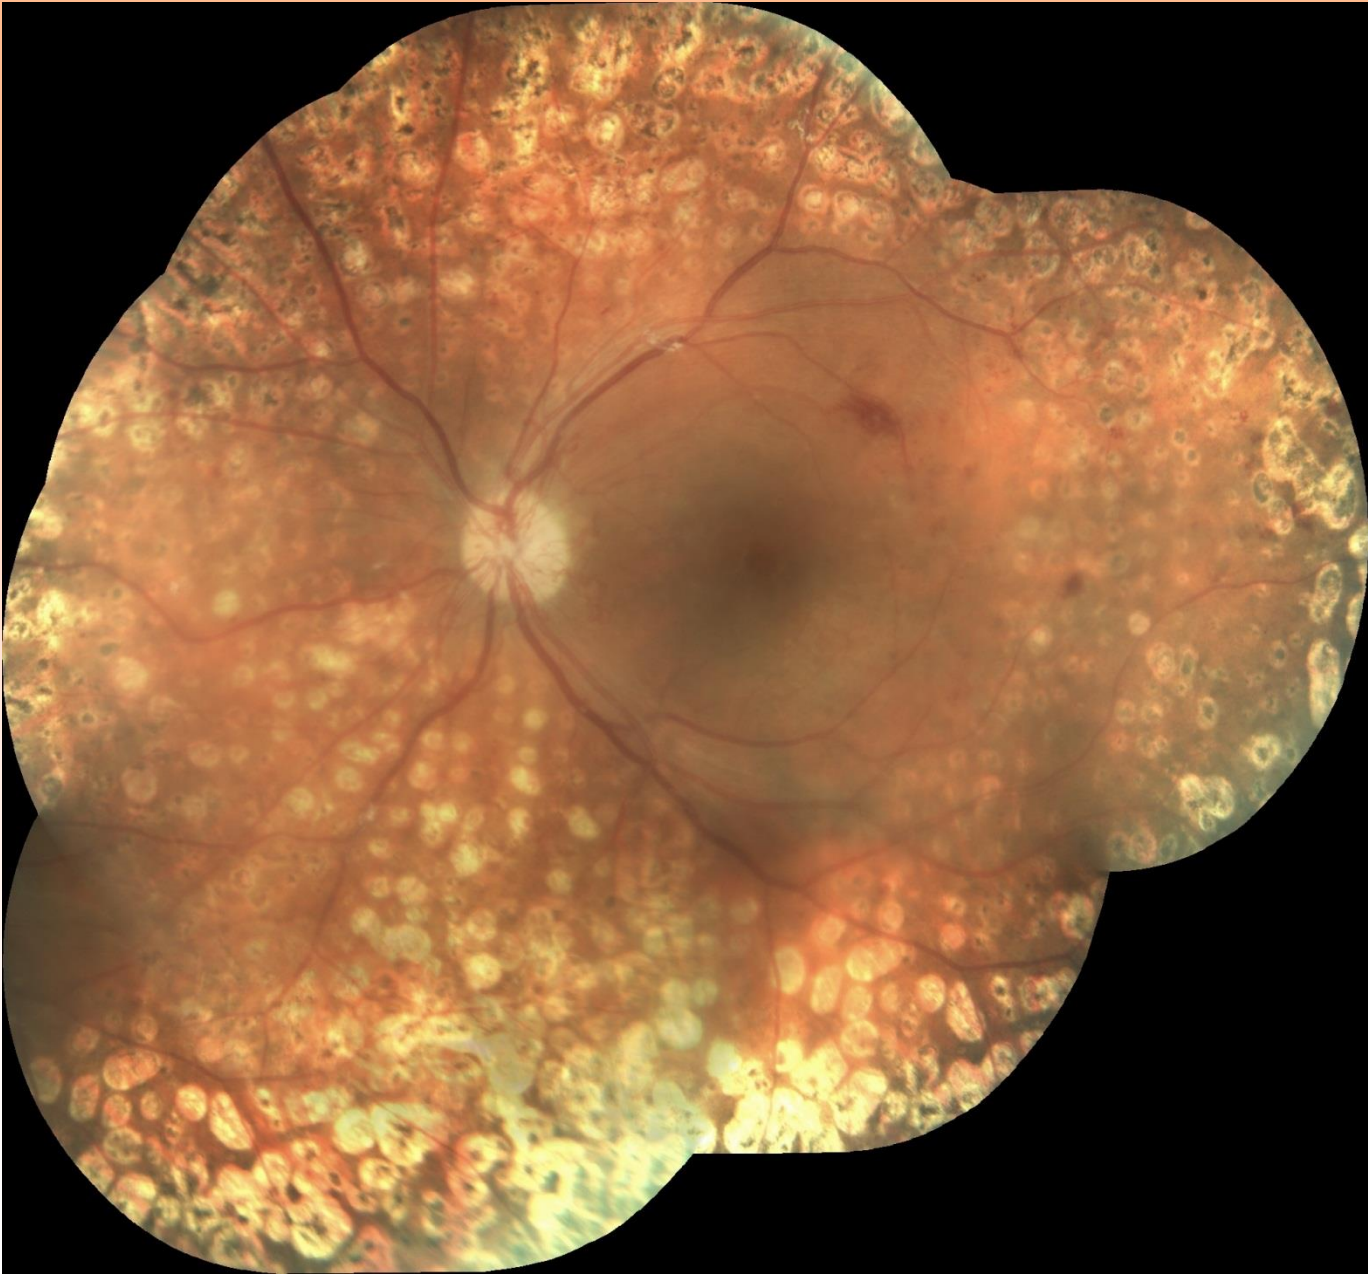

2nd Trimester

- Further laser given to both eyes throughout the pregnancy
- A baby girl was safely delivered early July
- VA: 6/12 and 6/24 improving to 6/9 with a pinhole
- Antenatal diabetic clinic recorded improved diabetic control with insulin
- Lucentis re-commenced 15th August 2014
