Ethiopia

"The horn of Africa"

Total Population of 96.51 million (2014)

The most populous landlocked country in the world

Surrounded by:

Sudan, Eritrea, Djibouti, Somalia, and Kenya

Second-most populous nation in Africa after Nigeria

The Ethiopian calendar is 7 yrs , 3 months behind (February 2008)

Healthcare in Ethiopia

The main health problems are communicable (contagious) diseases (worsened by poor sanitation and malnutrition)

It is said 1 medical doctor per 100,000 people

119 hospitals (12 in Addis Ababa alone) and 412 health centres in Ethiopia

Avg life expectancy of 64 (under 60 out of City's)

Infant mortality rates are high, over 8% of infants die during or shortly after childbirth

As of 2012, Ethiopia's prevalence of HIV/AIDS for adults aged 15–49 was estimated at 1.30%

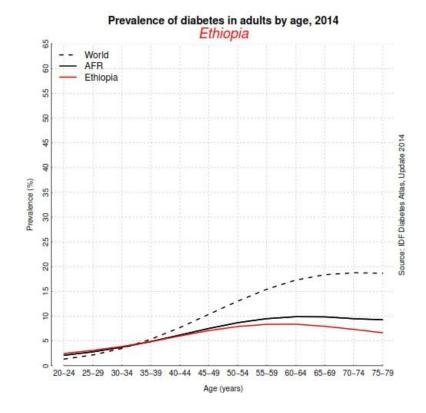

Diabetes

Ethiopia is a developing nation, with diabetes becoming more common as it becomes more "Westernised"

- 2.1m people with diabetes
- 1.6m people undiagnosed

Prevalence of 4.8% in adults

Diabetes expenditure/per person with DM \$29 in Ethiopia £2,000 in UK

Training in Birmingham

1 Year Medical placement

Sailing with Tedla

QA review of Grading

493 completed screening

Gender:

233/493 (47%) male 250/493 (51%) female (10 x unspecified)

Age:

Mean = 47 years Range = 8 to 78 years

Medications:

204/493 (41%) patients' medications recorded 113/204 (55%) were insulin treated

Visual Acuity:

60% of patients have a VA of 6/18 or worse

QA review of Grading

Unassessable:

12% images not gradable or possible

Diabetic Retinopathy:

39% of patients with no DR (ROMO) 17% of patients with background DR only (R1) 7% of patients with pre-proliferative (R2) 4% of patients with proliferative (R3)

28% of patients with maculopathy (M1)

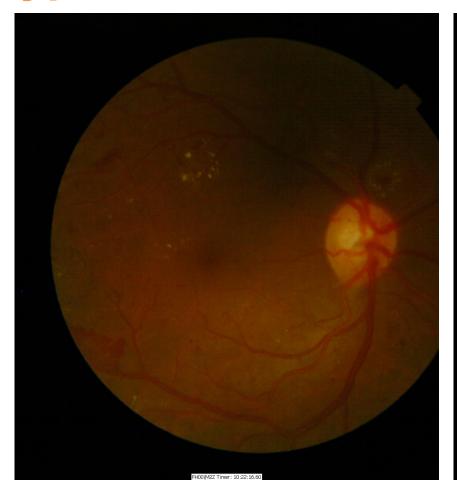

Agreement between BLDC & BSBC DESP was:

92% for those returned to annual screening,69% for those requiring urgent referral,98 % for specifically identifying sight threatening DR for referral.

Typical Cases

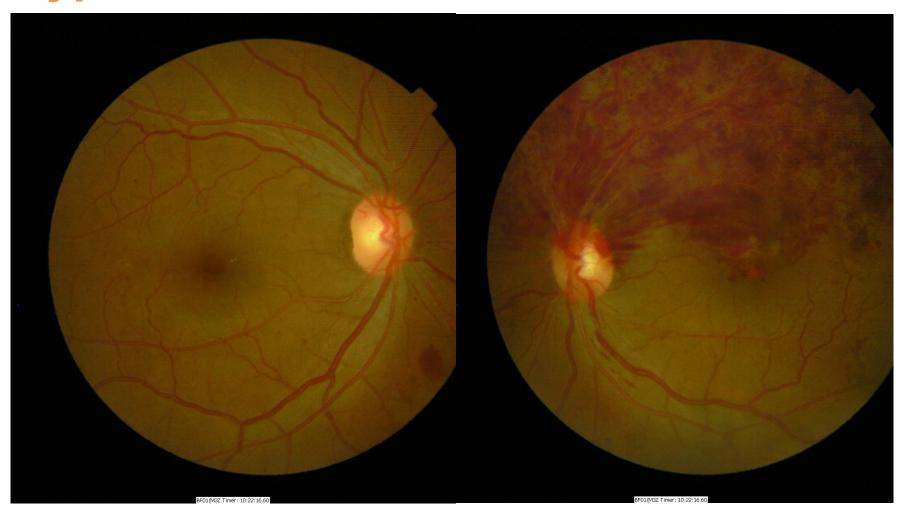

Proliferative diabetic retinopathy and maculopathy both eyes. VA: 6/6 both eyes!

Typical Cases

M1 RE and Occlusion LE

RE: 6/18 LE: HM

2009 – My first trip

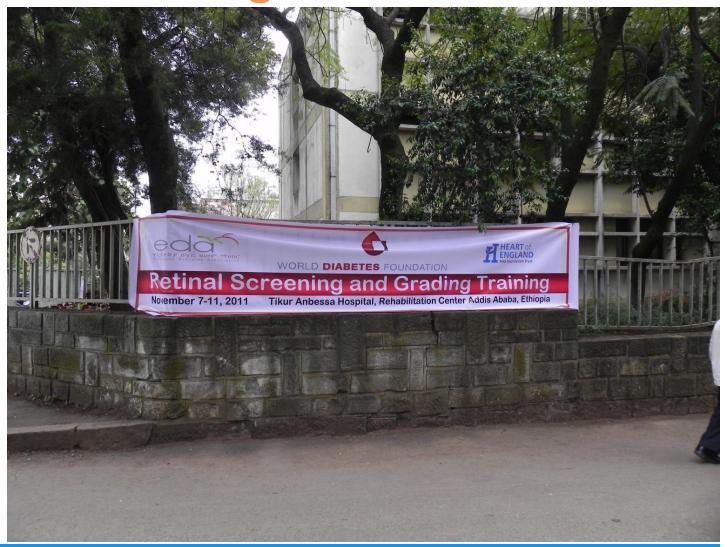

2009 - My first trip

2011 - Training

2011 - Training

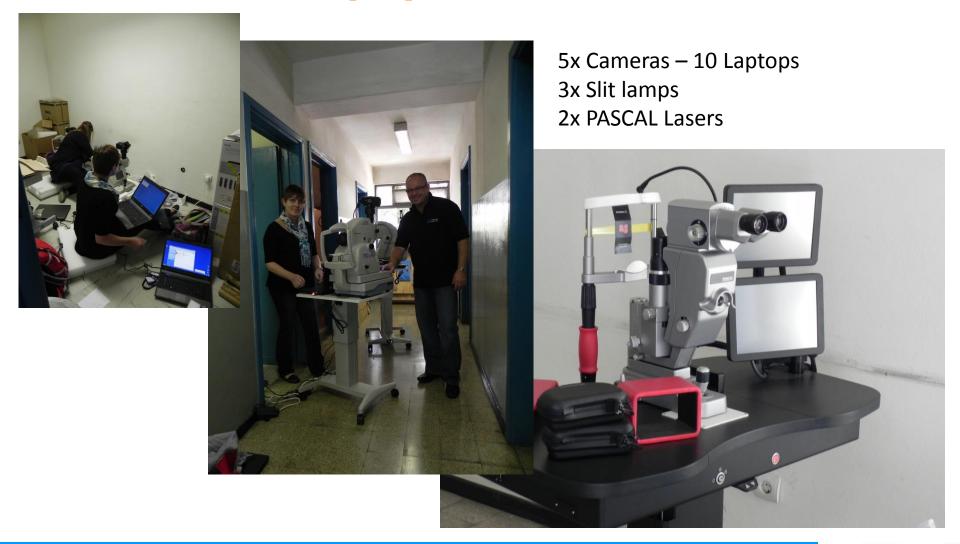

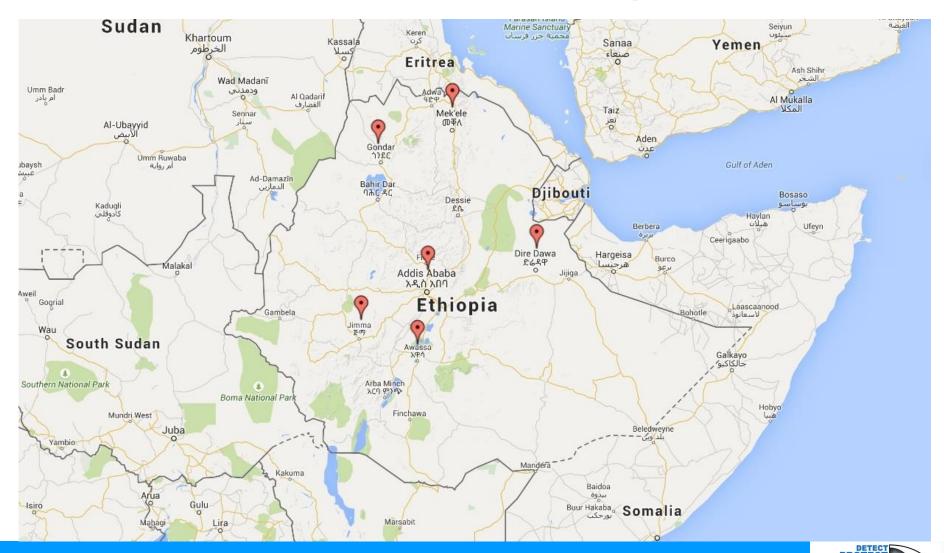

2011 - New Equipment

2011 - Additional screening sites

Project Summary

A total of 11,956 people have had their eyes screened & 2,650 people have had laser

Addis - 9763

Hawassa - 750

Gondar - 1434

Mekelle – 100

Jimma – Unknown

Dire Dawa – Not operation yet

Alongside eye screening the EDA have also raised the profile of eye health via patient Education/Awareness - 10,000 copies of DR Article and 5,000 DR leaflets were distributed to EDA branches

Problems encountered

- Target was 31,000 patients to be screened by July 2015
- 4 of the 6 camera sites are operational Jimma problems with camera
 Dire Dawa awaiting replacement DSLR
- 2 of the 3 sites with laser are operational Hawassa the laser is broken
- High staff turnover of trained screeners and ophthalmologists, of 22 nurses trained in 2011 only 10 returned for refresher training in 2014
- Lack of bio-medical engineers to maintain equipment
- EDA/WDF would like Ethiopian Ministry of Health to take ownership of the project

New technologies or Alternative screening methods....

Welch Allyn iExaminer

PanOptic Ophthalmoscope with adapter for the iPhone 4 or 4S

5 or 8 megapixel images

5X larger view of the fundus vs. standard ophthalmoscopes

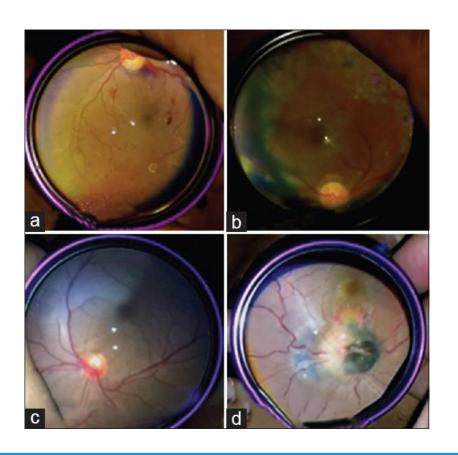

25 degree view of retina

£700 plus phone cost

Phone & Volk lens

Thank You

Dr Ahmed Reja
Dr Tedla Kebede
Dr Emmanuel
Sister Wubit
Nurse Tsion
All the Drs, Nurses who attended both Training events
Misrak – Ethiopian Diabetes Association
Word Diabetes Foundation

UK:

Dr Margaret Clarke - Diabetologist
Dr Alex Wright - Diabetologist
Dr Rachel Garrat – Previous HEFT screener/grader
Andrew Mills – BSBC DESP IT Manager
Laurance Quant – BSBC DESP Deputy IT Manager
David Roy – BSBC DESP IG Manager + screener/grader
Raphel Sofair – Screener/grader – Medical Imaging
Karen Whitehouse – BSBC Training Lead
Hayley Chambers – BSBC Screener/grader
Neil Wilkinson – BSBC Screener/grader + IT Technician
Prof Paul Dodson

Additional Support:

Jon Hildred – Donation of 2nd camera
John Speakman – Palliative Care
Trish Castenor – St Marys Hospice
Debbie Brewer – HEFT DSN
Lynn Dodson – Oncology
Alison Page - Oncology
Lee + Richard – Topcon
Dr Simon Smith – Vascular Surgeon
Dr David Gurevitch – Oncology Surgeon
Dr Grace Smith – Consultant Microbiologist

Novartis Pharmaceuticals Topcon – Donation of first camera Digital Healthcare (Classic Software)
