

FAILSAFE FORUM
Friday 28th September 2018

Zoe Tobin
West Sussex DESP Failsafe & Administration Co-ordinator
&
BARS Secretary

About me.....

- 10 years in DESP
- BARS Council
- Failsafe
- I'm not a know it all. 😊

Content....

- Newly Diagnosed Patients
- Capacity & Demand
- GP2DRS
- Excluded and Off-Register patients
- Referrals to HES
- Wish List

About you....

What's your name?

What's your job title?

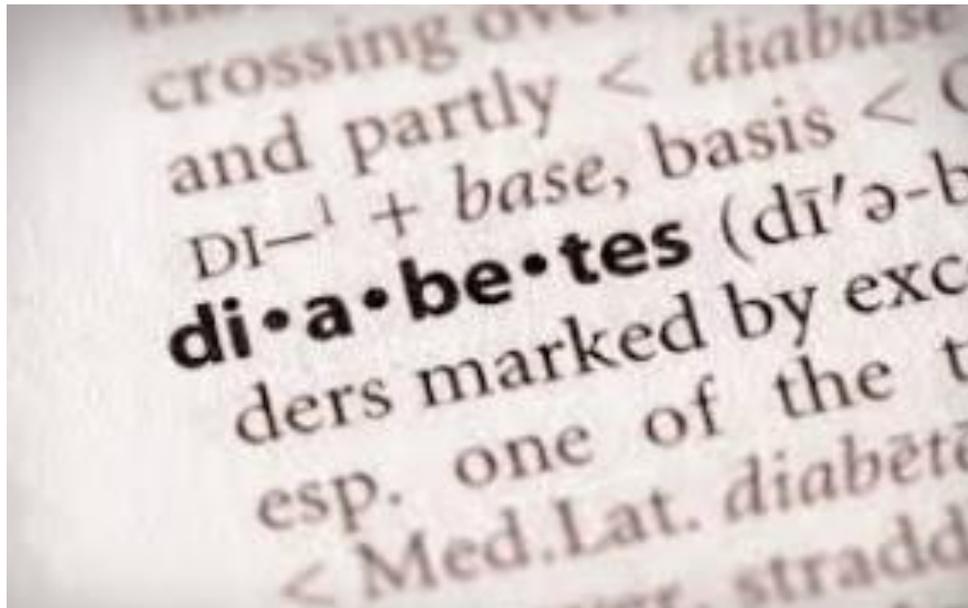

Where are you from?

Why we do what we do....

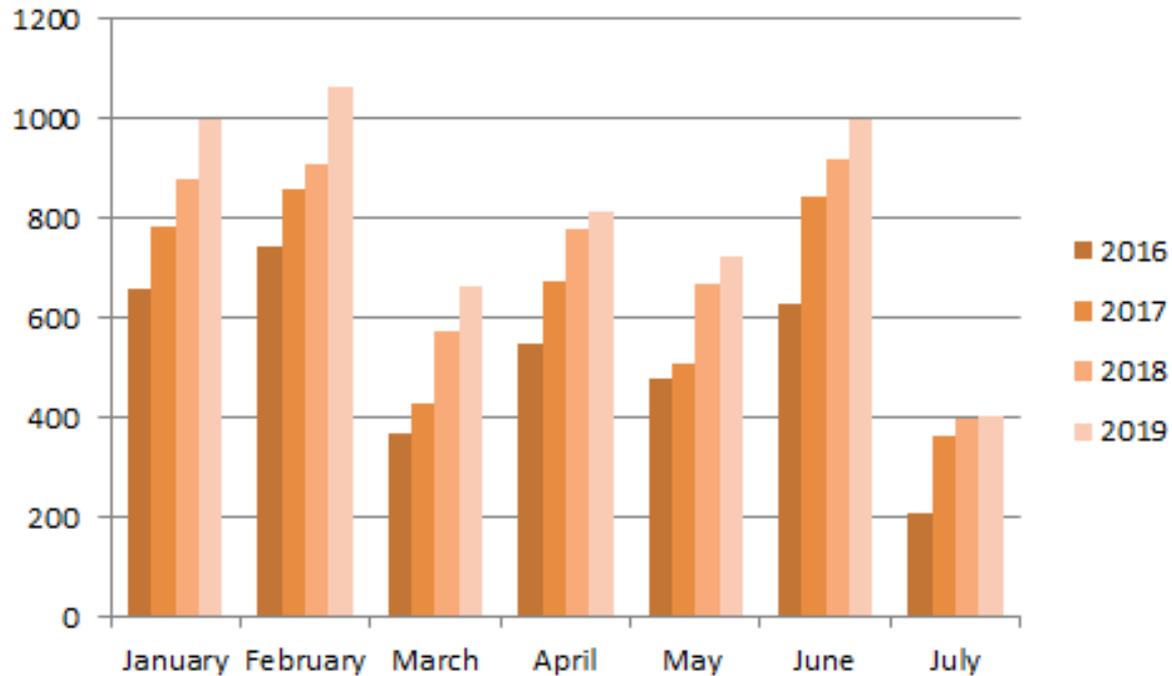

Failsafe is a back-up mechanism, in addition to usual care, to ensure that if something goes wrong in the screening pathway, processes are in place to (a) identify what is going wrong and (b) what action follows to ensure a safe outcome.

NSC Failsafe Document, September 2013

Newly diagnosed patients....

Capacity & Demand....

Capacity & Demand....

How do you ensure that your patients are seen within National Guidelines?

What do you do to minimise wasted appointments?

Does your software provide you with all the tools?

GP2DRS.....

GP2DRS

A centrally endorsed and standardised solution
to simplify the sharing of patient data between
GP practices and local DES programmes

GP2DRS.....

Does your programme use GP2DRS?

How are you all finding this, have you experienced any issues or, have you noticed a significant improvement?

If you have noticed any issues, what you have you done to resolve these?

How do you think the improvement has impacted your programme?

What tool are you using to validate your data returns?

Excluded and Off-Register.....

Opted-out

Medically unfit

Screened Elsewhere/Seen in another programme

Referrals to.....

Hospital Eye Service

- How does your programme ensure that your patient is seen within the timescales?
- How do you identify if your patient has been seen?
- How do you add your information to your system?
- Do you have any struggles?

Finally!!.....

If your programme had unlimited resources and funds, what do YOU think could make your life in Failsafe easier?

Over to you.....

Thankyou for attending, I hope you leave here with some new ideas on how to improve your Failsafe.

I am happy to answer any questions or, if you would prefer to email me:
